

Docket No. RSW920000160US1

**ABSTRACT OF THE DISCLOSURE**

**METHOD, APPARATUS, AND PROGRAM FOR PROVIDING SCRIPTED  
ELECTRONIC BUSINESS CARDS AND ELECTRONIC CALENDARS**

The present invention provides a mechanism for building  
5 scripted vCard and vCalendar objects based on the accessing  
user or the environment in which they are accessed. A vCard  
or vCalendar object may generate a text-based vCard or  
vCalendar based on credentials. A vCard or vCalendar may be  
implemented as a Java server page (JSP) template, wherein  
10 the basic structure of the vCard or vCalendar is contained  
in the template, with appropriate invocations of Java  
methods to fill fields as appropriate. Alternatively, the  
vCard or vCalendar may be in standard text form, with fields  
replaced with JavaScript code. The holder of the vCard may  
15 then dynamically generate the vCard or vCalendar fields by  
invoking the scripts corresponding to the fields of  
interest, within the context of an execution environment  
that contains the credentials.
